Hi Pat,

Would you be available for a quick meeting this week? I think you're the best person in terms of who has the clearest idea of the desired scope for what we want the final Austin St project to look like.

Thanks,

Stephen Weisenburger, E.I.T., ENV SP

[This message came from outside the City of Houston email system. Please be careful while clicking links, opening attachments, or replying to this email.]

I will start working on the proposal for WA#7, but I do have questions regarding the existing dedicated bike lane. If we mill and overlay, the current bike lane has concrete raised areas closer to Holman that appear to be METRO bus stops. Are these to be completely demo'ed and removed? See attached exhibit from Google Earth. Will a new bus stop need to be added to the existing sidewalk at these locations since we are creating a sharrow lane? Then from McGowan to Pierce, the lane configuration is much different than what you show on your lane go-by. The cross section from Holman to south of McGowan matches the exhibit mostly, but do we keep, then mill & overlay the bike lane from McGowan to Pierce?

The two segments (either side of McGowan) have enough variations in the cross section, I recommend a quick meeting to discuss this further so I can get our survey sub capturing the correct info and we can get the overall scope correct.

---

Good afternoon Lee,

I hope you're doing well. I'm looking forward to reviewing your submissions on work orders 1-6.

Please prepare a proposal for Work Order #7 on the N-321040-0087-3 contract. The project is a rehab (mill & overlay) of Austin St, from Holman to Pierce. Additionally, it will require some design work on the lane configuration. We would like to take out the dedicated bike lane and use sharrows instead. See attached for an example mockup of what some sections (roughly Holman – McGowen) could look like.

Feel free to reach out with any questions or concerns.

Best,

Stephen Weisenburger, E.I.T., ENV SP
